

## USE OF LOGO ON STATIONERY PRODUCT CERTIFICATION

You have been issued 2 separate Logo's:-

- Global Certification Logo only
- Global Certification and JAS-ANZ Accreditation Symbol together

As one of GC's certified companies, you have a number of options to advertise your certification. However, there are restrictions on how you can advertise your logo;-

- You may not claim in any communications a broader claim for certification than is actually covered by your certificate i.e. not certified products

### 8.4 Reference to certification and use of marks

**8.4.1 "A certification body shall have a policy governing any mark that it authorizes certified clients to use. This shall assure, among other things, traceability back to the certification body. There shall be no ambiguity, in the mark or accompanying text, as to what has been certified and which certification body has granted the certification."**

The certified product logo may only be reproduced and placed on product that has been made under the certified scheme and may only be reproduced **without the JAS-ANZ Symbol**;

- AS/NZS 1546.1:2008 Onsite Domestic Wastewater Treatment Units, Part 1 Septic Tanks
- AS/NZS 1546.3:2008 Onsite Domestic Wastewater Treatment Units, Part 3 Aerated Wastewater Treatment Systems
- AS/NZS 4766:2006 Polyethylene Storage Tanks for Water and Chemicals
- ATS 5200.026:2004 Technical Specification for Plumbing and Drainage Products, Part 026: Cold Water Storage Tanks
- AS 3735:2001 Concrete Structures retaining liquids

If you use the logo's in a manner which complies with the requirements above the logo can be used in the following ways;

- The GC Logo by itself "Usual Method"
- Both the GC logo and the JAS-ANZ logo together

**Use of the JAS-ANZ Accreditation Symbol without the GC logo is prohibited by a JAS-ANZ requirement (JAS-ANZ Procedure #3, Rules of Procedure Governing the use of the Accreditation Symbol), this is outlined in the original Contract/Application you have already signed and agreed to.**

Whilst both logos have distinctive colouring in their own right, they may be reproduced in a mono colour of the company's choice to fit existing corporate colour schemes. The JAS-ANZ logo may not be reproduced in any combination of colours except PMS Reflex Blue and PMS 485 Red. The Management System Standard and Certificate Registration number is placed underneath the Logo. Size of the logo/s and text is your choice, however the text must be legible and the GC and JAS-ANZ logos must be of the same size.

Where the logo is used on stationary, it must be used in conjunction with your certification details.
